Portfolio

Software Developer with 3+ years of experience specializing in Flutter and modern web technologies. Experienced in building scalable eCommerce and service-based applications with Google Maps real-time tracking and secure payment integrations. Strong focus on clean code, maintainability, and high-performance user experiences.

EXPERIENCE

Osous Technology LLC, Hybrid— *Software developer*

FEB 2024 - PRESENT

- Developed scalable eCommerce applications for **mobile and web platforms** using Flutter and Next.js.
- Implemented **real-time tracking**, **secure payment gateways**, and optimized backend API integrations.
- Built **admin dashboards** with full CRUD functionality for products, users, orders, and content.
- Collaborated closely with **UI/UX designers** to deliver responsive, high-performance applications.
- Participated in code reviews and feature planning to ensure maintainability and scalability.

DropIdea Team, Freelance— *Flutter developer*

OCT 2022 - NOV 2023

- Designed and developed **cross-platform mobile applications** using Flutter.
- Built systems including an **Invoice Management App** and a **Home-Working Platform**.
- Developed and maintained **admin panels** for system management.
- Implemented **authentication and role-based access**.
- Ensured performance optimization and consistent UI across devices.
