PROFESSIONAL SUMMARY

Software Developer and Flutter Specialist with 3+ years of experience building cross-platform mobile applications and supporting web/admin platforms across eCommerce, transportation, logistics, healthcare, payments, identity verification, and other business domains. Skilled in translating business requirements into mobile interfaces, integrating REST APIs and third-party services, and building admin dashboards with full CRUD functionality. Primary stack is Flutter/Dart, complemented by Next.js/JavaScript, Firebase, Google Maps, and payment/identity-verification integrations. Uses AI-assisted development tools and workflows (Claude, Cursor, custom rules and agents) to accelerate delivery while maintaining strong engineering judgment.

EDUCATION

Bachelor in Networks Engineering — Homs University

- GPA: 80.999
- Comprehensive study of network engineering principles, computer systems, and software development fundamentals

WORK EXPERIENCE

Software Developer — October 2026 – Present
General Authority for Radio and Television — Damascus, Syria

Software Developer — February 2024 – October 2026
Osous Technology LLC

- Developed and maintained production Flutter applications for Android and iOS across eCommerce, delivery/logistics, and multi-vendor platforms, serving customer, vendor, driver, and service-provider roles
- Built core eCommerce flows -- catalog, cart, checkout, coupons, orders, and ratings -- and contributed to admin dashboards with full CRUD functionality
- Integrated Google Maps and live location tracking for transportation and delivery workflows, including driver location updates and route visualization
- Integrated payment gateways including Zain Cash, handling checkout, payment status, and order-workflow synchronization
- Implemented authentication, role-based access, and Firebase-backed infrastructure (auth, push notifications, app configuration)
- Collaborated with backend and frontend developers using Git workflows across debugging, testing, and release preparation

Flutter Developer — October 2022 – November 2023
DropIdea Team

- Built and shipped an Invoice Management application and admin panel covering invoice creation, billing workflows, and payment-related data
- Developed a Home-Working platform connecting freelancers and service providers with job opportunities, including role-based access and service workflows
- Implemented authentication, state/data management, and REST API integration across both mobile applications
- Delivered cross-platform Flutter UI with consistent performance across Android and iOS, collaborating closely with backend teams on business logic

PROJECTS

Darbak
Flutter, *Google Maps*, *Live Tracking*

- Multi-service transportation platform (paired customer + driver apps) for ride, delivery, and towing requests
- Built real-time trip tracking, live location updates, and route visualization for both riders and drivers
- Implemented driver-side trip management and earnings tracking alongside customer-side ride booking

Benz Technical App
Flutter, *eCommerce*, *Vendor Management*

- B2B/B2C Flutter eCommerce app for electricians and general users to browse and purchase electrical products
- Built vendor management, dealer locator, order tracking, and a customer rewards/gifting system

EpiHope
Flutter, *Next.js*, *Healthcare*

- Healthcare application for epilepsy patients and doctors covering health tracking and medication management
- Built patient-facing mobile app alongside a Next.js admin dashboard for care coordination and research access

Border Ports App
Flutter, *Real-time Monitoring*, *Data Analytics*

- Operations app for authorized personnel to monitor and manage border port activity
- Delivered cargo tracking and real-time monitoring dashboards for port security and management use cases

Green
Flutter, *Multivendor*, *Dual User Roles*

- Dual-role multivendor marketplace serving both farmers and hobbyists buying tools, seeds, and equipment
- Tailored browsing and content experience per user type on top of a shared multivendor catalog architecture

SKILLS

• Flutter • Dart • Android • iOS • Bloc/Cubit • Provider • GetX • REST APIs • Firebase • Google Maps Platform
• Zain Cash • Stripe • KYC • Uqudo • IDWise • Othento • Next.js • JavaScript • NestJS • PostgreSQL • Git
• Linux • Docker • Claude • Cursor • AI-Assisted Development

LANGUAGES

Arabic (Native) • English (Very Good)
